About

Hey there, I'm sudarsan k pai, a 21-year-old based in Bangalore, India.

I'm a passionate developer and have built a few projects that I'm proud of, including [Spiritwolf](#), a productivity app, [todolist \(next js\)](#), an npm package for forms [tailwind-inputs](#). I'm always looking for new opportunities to learn and grow as a developer.

When I'm not coding, I love to read books and explore new topics. I'm also fascinated by blockchain technology and currently pursuing a course on blockchain development at [Codedamn](#).

In addition to my own projects, I'm also pursuing a full-stack development course with [UpGrad campus](#) to further develop my skills.
